The AFG1022 Arbitrary Function Generator provides a waveform generation tool with the best price performance ratio. It includes dual channel, 25 MHz bandwidth and up-to 10 V\textit{p-p} output amplitude. The four run modes, 50 built-in frequently-used waveforms and the built-in 200 MHz frequency counter cover most waveform generation needs in your experiment and test jobs. The 3.95-inch TFT LCD, short-cut buttons, USB interface and PC software provide the most intuitive ways to configure the instrument.

Features and benefits

- Dual-channel, 25 MHz sine wave, and 12.5 MHz square/pulse wave provides a cost effective solution for basic education and other applications
- 125 MS/s sampling rate and 14-bit vertical resolution enable great signal fidelity
- 1 mV\textit{p-p} to 10 V\textit{p-p} output amplitude over the whole frequency range
- The intuitive user interface shortens the learning curve for students and other users
- 2 to 8,192-point length of memory for user-defined arbitrary waveforms
- 64-MByte internal non-volatile memory for arbitrary waveform storage
- Standard USB host/device for memory expansion and remote control
- Continuous, sweeping, burst, and modulation modes covers most requirements for students and other users to get the experiments/test job done
- Built-in 200 MHz counter with 6-digit resolution offers an easy and precise way to measure frequencies/periods/pulse widths/duty cycles

Applications

- Electric and electronics experiments
- Communications experiments
- Sensor simulation
- Functional test

Performance and features

1 \(\mu\text{Hz}\) to 25 MHz sine waveform range, with 12-digit or 1 \(\mu\text{Hz}\) resolution and a \(\pm 1\) ppm drift high stability time base, provides great signal fidelity in the frequency domain. With 1 mV\textit{p-p} to 10 V\textit{p-p} output amplitude range, and 14-bit or 1 mV\textit{p-p} resolution over the whole frequency range, there is no need to compromise between output amplitude and frequency any more.

Four different run modes and four modulation modes cover most use cases with a cost effective solution. 50 most-frequently used standard and arbitrary waveforms are built-in for easy access. Up to 8,192 points arbitrary waveforms memory enables users to replicate real world signals captured with a Tektronix oscilloscope or defined with ArbExpress. The built-in 200 MHz and 6 digit resolution frequency counter is an easy and precise way to measure frequencies/periods/pulse widths/duty cycles.
Ease of use
The high-resolution 3.95-inch color TFT display shows relevant settings and parameters in both text and graphic formats, which give users full confidence in their settings, and let them focus on the task at hand. The front panel shortcut buttons and rotary knob make accesses to most frequently used functions and settings with minimum effort and time. The built-in 64-MByte non-volatile memory together with USB stick memory interface, provide unlimited space for user-defined waveform storage.

Software and solutions
Compatible with ArbExpress, the user-defined arbitrary waveforms generated by the free software can be loaded on the AFG1022 easily with a USB memory stick.

As a building block of Tektronix educational solution, the AFG1022 can be embedded into TekSmartLab and enable a cost efficient and effective way of teaching, learning, and lab management.

Specifications

Channels

| Number of channels | 2 |

Built-in waveforms

| Built-in waveforms | Sine, Square, Pulse, Ramp, Noise, and 45 frequently used arbitrary waveforms |

**Frequency counter**

- **Pulse width and duty cycle measure**
  - 1 Hz to 10 MHz

- **Input impedance**
  - 1 MΩ in parallel with 100 pF

- **High frequency noise restraint (HFR)**
  - On / Off (HFR frequency = 500 kHz)

- **Sensitivity**
  - Low, middle, or high

- **Trigger level range**
  - -2.5 V to +2.5 V

**Auxiliary inputs and outputs**

- **External modulation input**
  - **Input frequency range**
    - DC to 20 kHz
  - **Input voltage range**
    - All except FSK: ±1 V full scale, FSK: 3.3 V logic level
  - **Input impedance**
    - 12 kΩ (typical)

- **External trigger input**
  - **Level**
    - TTL-compatible
  - **Slope**
    - Rising or falling (selectable)
  - **Pulse Width**
    - >100 ns

- **External reference clock input**
  - **Impedance**
    - 400 Ω, AC coupled
  - **Requested Input voltage swing**
    - 100 mV<sub>pp</sub> to 5 V<sub>pp</sub>
  - **Locking range**
    - 10 MHz ±9 kHz

- **External reference clock output**
  - **Frequency**
    - 10 MHz
  - **Impedance**
    - 50 Ω, DC coupled
  - **Amplitude**
    - 1.6 V<sub>pp</sub> into 50 Ω load

**Communication interface**

- **USB**
  - Host and device, USB TMC compliance

**Display**

- **Display type**
  - 3.95-inch

- **Display resolution**
  - 480 by 320

- **Display colors**
  - 65,536

Accessories

Standard Accessories
- AFG1022 Arbitrary/Function Generator Safety and Compliance Instructions; printed document
- AFG1022 Documentation CD containing the following PDF documents:
  - AFG1022 Arbitrary/Function Generators Quick Start User Manual, English
  - AFG1022 Arbitrary/Function Generators Quick Start User Manual, Simplified Chinese
  - AFG1022 Arbitrary/Function Generators Programmer Manual
  - AFG1022 Arbitrary/Function Generators Specifications and Performance Verification Manual
- Packing list
- Power cord, specified by country
- Certificate of calibration; printed document
- USB cable x 1, Type A to Type B
- BNC cable x 2
- Tektronix Supplemental Information Sheet For the Peoples Republic of China: China RoHs; printed document
- Fuse, cartridge; 5 x 20 mm, 0.5 A, 250 V, time-delay
- Fuse, cartridge; 5 x 20 mm, 1 A, 250 V, time-delay

Warranty
- Three year warranty on parts and labor

Recommended accessories
- 174-4401-xx, USB cable, type A to type B cable – three feet
- 174-5194-xx, USB cable, type A to type B cable – six feet
- 012-1732-xx, BNC cable assembly, 0 to 1 GHz, shielded – three feet
- 159-0568-xx, Fuse, cartridge; 5 x 20 mm, 0.5 A, 250 V, time-delay
- 159-0569-xx, Fuse, cartridge; 5 x 20 mm, 1 A, 250 V, time-delay

Tektronix is registered to ISO 9001 and ISO 14001 by SRI Quality System Registrar.

Product Area Assessed: The planning, design/development and manufacture of electronic Test and Measurement instruments.
